dealings for the day of 1,672,000 shares and inroads on prices of 1 to 8 points and inroads on prices of 1 to 8 points for practically all the active stocks offer evidence of a liquidation in the stock market sufficiently drastic and embracing to call for some other explanation than temporary vagaries of speculative sentiment or merely technical conditions in the stock market itself. The speculative sentiment itself was plunged in gloom, and was inclined to give rein to sensational forebodings of the consequences to ensur from the conditions which it saw reflected in the action of the day's market.

from the conditions which it caw it fleeted in the action of the day's market.

That all is not as well with the body economic or with mance and industry as was assumed when prices of stocks were 10 to 40 points higher than were touched on the declines to-day, is borne in upon the mind with conviction. The opinion that overlay practically all others, and tinged the whole was that commercial recession and industrial reaction were to be read in the action of the securities market. This opinion has been gathering adherents for severral weeks past.

In the mood of the stock market today the conomic tendency of expanded gold production and price initation to bring on financial critess attracted attention. Another factor was the authority given to views publicly stated by qualified legal testimony shown to represent the views of large organizations of capital of the harm to follow from the proposed enforcement of the Shorman antitrust law.

represent the views of large organizations of capital of the harm to follow from the proposed enforcement of the Sherman antitrust law.

The word "panie" found first expression, and the fact was disturbing to the market element. There was feat that in the break in the course of upward prices of commodities there would follow a period of deflation, which would arrest the course of prosperous activities all through the channels of commerce.

The market had an effective rally of i to 3 points in the final hour, and the closing tone was strong and well sustained at the recovery, but the inviting profits on the day's decline offered to the bears obviously supplied much of the inducement for this buying.

Bonds were weak, but with no signification of the demoralized tone of stocks. Total sales, par value, \$2,022,000, United States 2's declined 1-8 and the 4's 1-4 per cent, on call. Tetal sales of stocks to-day were 1.672,400 shares.

COTTON MARKETS.

New York, February 2.—Weakness in the stock checked an early advance in the cotton market, and the price cased off during the afternoon under scattered liquidation and a renewal of local bear pressure. The close was about quier and steady, net unchanged to 8 points.

The market opened steady at a decline of 2 points to an advance or 1 point, which was about in line with Liverpool futures. The first tendency of the market was upward on excellent trade advices from Manchester, resports of continued streamers in the South and the ersectation or builtain up to 14.55 and July to 14.55, or about 655 points not higher. But as goon as local professionals was that weakness in the stock market was bringing out some Wall Street rotten offerings became heavier, and while there was a good demand on a scale down like market developed an easier tone in the absence of assessive bul support. May contracted the points and 9 points under last nights close. Covering caused a partial recovery in the last tow mindes with May coloning ht 14.55 bid, or only a points and condition in the

# VIOLENT DECLINE IN STOCK MARKET

Steel Leads Downward Movement and Reaches Lowest . Level Since September.

New York, February 3.—The onslaughts of an aggressive bear party, together with gathering distrust of the industrial, business and political cutlook, brought about violent delines on the New York Stock Exchange to-day, with United States Steelieading the downward movement. In all, sales totalled 1,872,000 shares, with a fourth of this aggregate in steel shares, which early in the afternoon broke to 78, the lowest level reached since September last. The prices today represented a break of 2 points from yesterday's closing point, of 41-2 from yesterday's high, of 131-4 points from January 3, when the high record of this year was touched, and of 171-8 from the price of October last.

Chief interest centred in the decline of steel, but there was yielent liquidation of nearly every stock in the list, carrying prices down from 6 to 8 points with sensational breaks between sales. Because of the nervousness of the market brokers cautioned their clients to remain within call, ready to put up additional margins if necessary, and many whose accounts were on the "ragged edge" closed out, taking their losses rather than risk further decimes.

The net price changes do not register the full effect on prices, ewing to the really which occurred in the closing, New York, February 3.-The on

B. Wilson, a farmer of Wardensville, W. Va., caught a wild cat yesterday in a trup he had set for rabbits, and had a desperate encounter with the feroclous beast while he and his two sons were placing it in a box. The animal was shot, and the entire population of Wardensville gathered to see it. The cat, which weighed sixty-five pounds, was one of the largest ever seen in that section of West Virginia.

## Sound Management.

Just as Capital and Surplus determine the degree of safety which a financial institution affords to its depositors, so the growth in the number of its patrons shows the confidence in which it is the confidence in which it is held by the community. The fact that this bank has had a rapid and sleady growth since its establishment, so that its total Resources now amount to over \$4,500,000.00, is ample evidence of sound and stable management.
